# myRTI: Achieves Over 100% Growth in the Past Year

RTI, a world-leading manufacturer of quality assurance (QA) solutions for diagnostic radiology, is celebrating two years since the launch of its ground-breaking cloud-based QA management platform, myRTI.

myRTI is a comprehensive cloud-based QA platform designed to manage complex medical equipment data and measurements, support multimodal equipment management, and provide tools for intra-organizational workflows and tasks. It serves both large and small organizations, including multi-site hospital groups, extensive service organizations, and local medical imaging boutiques.

Since its release, myRTI has experienced exceptionally rapid user adoption, with several hundred new users joining the platform every month. This impressive growth has resulted in an annual increase of over 100% in its user base.

Elin Sahlberg, CEO of RTI GROUP, comments: “In our industry, where accountability and traceability must align with enhanced efficiency, a cloud-based solution is indispensable. We are witnessing a growing emphasis on software across the industry, with increasing value derived from the software components of our solution. The rapid adoption of myRTI demonstrates that the market recognizes this as the future.”

## About RTI

RTI is a world-leading manufacturer of quality assurance (QA) solutions for diagnostic radiology. In 1981, RTI invented the first X-ray QA systems and since then, innovation has been at the heart of our corporate philosophy. Our comprehensive independent QA solutions allow medical physicists and service engineers across the world to ensure that X-ray units in all modalities are optimized and safe. RTI's X-Ray QA hardware and software are used by hospitals, manufacturers of X-ray equipment, service companies and government authorities worldwide, across all different modalities, including R/F, dental, CT, mammography, interventional and surgery (C-arms). With design, manufacturing and calibration services carried out in Sweden, RTI has sales offices in America, Asia and Europe and is represented by up to 100 distributors worldwide.
