

INDEPENDENT X-RAY
QUALITY ASSURANCE

RTI Group Secures Major OEM Order for Revolutionary Mako X-Ray Quality Assurance System

Gothenburg, Sweden, August 20, 2024

RTI Group, a world-leading manufacturer of quality assurance (QA) solutions for diagnostic radiology, is proud to announce a significant OEM order for its innovative Mako X-ray quality assurance system. This milestone order underscores the industry's recognition of Mako's unparalleled efficiency and accuracy.

Mako, RTI's new premium QA solution, offers the broadest application range in the market. Its plug-and-play simplicity and comprehensive measurement capabilities – including kVp, Time, HVL, Total Filtration, Dose, and Dose rate – make Mako a pioneering tool for enhancing workflow management across Radiography, Fluoroscopy, CT, Dental, and Mammography applications.

Fredric Eliasson, VP of Sales at RTI, said: "Mako is the best X-ray quality assurance solution on the market. While it takes time to establish a new product, this major order from a leading global OEM with high standards confirms Mako's position as the top choice in the industry."

Mako is designed to unlock time efficiency and cost savings by harnessing the power of a single tool across a wide range of X-ray systems and applications. It integrates seamlessly into existing workflows, ensuring no detail goes unchecked. Its platform-based design ensures a future-proof solution, continuously evolving through innovation and updates. RTI also offers extensive support, including training, calibration, and compliance assistance. For more information, visit [Mako by RTI](#) or [RTI Mako Meter](#).

About RTI

RTI is a world-leading manufacturer of quality assurance (QA) solutions for diagnostic radiology. In 1981, RTI invented the first X-ray QA systems and since then, innovation has been at the heart of our corporate philosophy. Our comprehensive independent QA solutions allow medical physicists and service engineers across the world to ensure that X-ray units in all modalities are optimized and safe. RTI's X-Ray QA hardware and software are used by hospitals, manufacturers of X-ray equipment, service companies and government authorities worldwide, across all different modalities, including R/F, dental, CT, mammography, interventional and surgery (C-arms). With design, manufacturing and calibration services carried out in Sweden, RTI has sales offices in America, Asia and Europe and is represented by up to 100 distributors worldwide.
