

# RTI Adds Multi-Language Support to Mako Display App

Gothenburg, Sweden, 28 May 2026

RTI, a global leader in quality assurance (QA) solutions for diagnostic radiology, announces that the App-powered Mako Display now supports **multiple languages**, further strengthening its position as one of the most user-friendly and future-ready solutions in X-ray quality assurance.

With English as the default language, the **RTI Mako Display App** is now also available in **Spanish, Chinese, French, German, Italian, and Swedish**. This enhancement enables X-ray QA professionals worldwide to work more efficiently in their preferred language, improving usability, reducing training time, and supporting smoother workflows across international teams.

## Enhancing Accessibility in X-ray QA

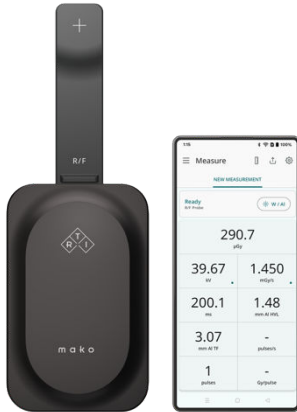

Since its introduction, the Mako system has redefined expectations in X-ray testing by combining groundbreaking detector technology with a modern, app-based user experience. The system delivers market-leading accuracy across a broad range of diagnostic X-ray applications, while simplifying measurement procedures for users in the field.

The addition of multi-language support reflects RTI Group's ongoing commitment to making advanced QA technology accessible to a global audience. Whether used in hospitals, service organizations, or by equipment manufacturers, the Mako Display App now provides a more intuitive and localized experience for users across different regions.

INDEPENDENT X-RAY  
QUALITY ASSURANCE

*“X-ray QA professionals operate in diverse environments around the world. By introducing multiple language options, we are making Mako even more accessible and efficient to use, regardless of location”* says Michael Olding, PhD, Vice President Solutions at RTI Group.

### Future-Ready and Scalable

The Mako Display App is built with a future-ready architecture, designed to support evolving needs in digital QA workflows, data management, and connectivity. It can be used as a standalone solution for fast, wireless measurements, or integrated with RTI Ocean software for more advanced analysis and reporting capabilities.

The app is [free to download](#), with no licensing costs, no user limits, and no restrictions, making it easy to deploy across teams and organizations of any size.

### About RTI

RTI is a world-leading manufacturer of quality assurance (QA) solutions for diagnostic radiology. In 1981, RTI invented the first X-ray QA systems and since then, innovation has been at the heart of our corporate philosophy. Our comprehensive independent QA solutions allow medical physicists and service engineers across the world to ensure that X-ray units in all modalities are optimized and safe. RTI's X-Ray QA hardware and software are used by hospitals, manufacturers of X-ray equipment, service companies and government authorities worldwide, across all X-ray modalities, including R/F, dental, CT, mammography, interventional and surgery (C-arms). RTI's design, manufacturing, and core calibration operations are based in Sweden, complemented by a U.S. calibration and service lab in New Jersey. With sales offices in the Americas, Asia, and Europe, RTI is further supported by a worldwide network of up to 100 distributors.
